

◆ AHscreens Co. & Reyes Homes LLC – Integrated Capability Introduction

1. Greetings and Partnership Overview

Good afternoon. My name is **Pan Cho**, CEO of **AHscreens Co.**, and I am here with **Angel Amarante**, CEO of **Reyes Homes, LLC**.

We have formed a strategic partnership between AHscreens Co.—a manufacturer of patented hurricane and security screen systems—and Reyes Homes, a General Contractor Licensed company with over 20 years of experience in window and door installation and residential construction.

Together, we deliver a **fully integrated one-stop solution** that includes **design, manufacturing, installation, and maintenance** of high-security, hurricane-rated window systems, specifically tailored for **U.S. military and federal facilities**.

2. Product and Integrated Solution Features

Our core product is a **U.S.-patented stainless steel mesh-based hurricane and security shutter system**, offering:

- **Category 5 hurricane certification** (withstands wind speeds up to 150 mph)
- **Manual operation** – requires no electricity
- **High security** – cannot be opened from the outside without physical destruction
- **Emergency egress** – operable from the inside at all times
- **All-in-one design**: visibility, ventilation, and protection in a single solution

Key product benefits:

- **Double powder-coated stainless steel** for corrosion resistance in coastal areas
- **Long lifespan** – over 30 years of durability with minimal maintenance
- **Easy to clean** with just tap water, even in dusty environments
- **5-year factory warranty**

- **Frame color options:** standard white and bronze, with custom colors available for volume orders

Our system is engineered to integrate **seamlessly with existing window and door systems**, ensuring **security, aesthetics, and energy efficiency** without compromising the building's architectural integrity.

3. Real-World Performance and Applications

Our solution is ideal for:

- **Military installations**
- **Federal buildings and embassies**
- **Secure warehouses and coastal facilities**
- **Private residential and commercial properties**

To date, our combined teams have completed **over 40 installations** in **Florida, Texas, and California**, and are prepared to respond to large-scale government and military requirements.

4. Visual Security Without Compromise

Our window screen system provides:

- **Daylight visibility from inside the facility**
- **24-hour high-level intrusion protection—even when unoccupied**
- **No obstruction to building aesthetics** – preserving and enhancing visual appeal

This system transforms any facility into a **state-of-the-art structure** in both security and appearance.

As this is a **new and unique technology**, we understand it may be difficult to fully visualize without experiencing it firsthand.

➡ **We would be glad to bring a sample to your location for a live demonstration at your convenience.**

5. Procurement Readiness and Team Credentials

700 Atlantis Road, Suite 101 Melbourne, FL 32904
